Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marks in view of Moore.

Marks disclose a container assembly having a front partially transparent label (12) having graphics and a rear label (14) located directly underneath said front label with complimentary graphics thereon. Marks lack the disclosure of complimentary graphics located on the container surface directly underneath said front label. Moore teaches that it is well known in the art to use complimentary graphics (13) on a container wall. It would have been obvious to one having ordinary skill in the art at the time the invention was made to replace the rear label of Marks with complimentary

graphics located on the container surface directly underneath said front label in the manner as taught by Moore to reduce the cost of the assembly.

In regard to claims 3 and 4 Official Notice is taken of the use of pressure sensitive acrylic adhesive and a substrate of polypropylene. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use these claimed features since the use of such is old and well known in the art. Further there would appear to be no inventive advantage by the use of such.

In regard to claim 5, it would have been an obvious matter of design choice to one having ordinary skill in the art at the time the invention was made to form the assembly such that the claimed removal force is needed, since applicant has not disclosed that this solves any stated problem or is for any particular purpose.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
